INTERNAL RISK FACTORS

- 1. One of our promoter group entities ‘Sai Broking’ was a party to certain legal proceedings for violation of SEBI (Prohibition of Fraudulent and Unfair Trade Practices relating to Securities Market) Regulation, 2003 and SEBI (Stock Broker and Sub Broker) Regulations, 1992. They are now resolved.**

One of our promoter group entities ‘Sai Broking’ was issued two show cause notices by SEBI. The brief details are as below:

- Show cause notice number EAD-5/VSS/RS/151406/2009 vide SEBI order dated October 16, 2008 to inquire into and adjudge under section 15 HA and 15 HB of the Securities and Exchange Board of India Act, 1992 the alleged violation of the provision of SEBI (Prohibition of Fraudulent and Unfair Trade Practices relating to Securities Market) Regulation, 2003 and SEBI Stock Broker and Sub Broker) Regulations, 1992 as observed during the investigations conducted by SEBI into the trading in the scrip of M/s BSEL and M/s Maharashtra Seamless Limited.

Jindal Stainless Limited.

Both these issues now stand resolved.

In the case of Show cause notice number EAD-5/VSS/RS/151406/2009 vide SEBI order dated October 16, 2008, the matter has been resolved by consent order dated June 03, 2011, vide letter number EAD-05/PG/PR/17928/2011.

In the case of Show cause notice number EAD/GBR/98426/2007 dated July, 2007 SEBI has exonerated Sai Broking vide their order dated May 06, 2011 and number PKK/AO/96/2011.

Further, there is no assurance that similar proceedings will not be initiated against our Promoters or our other group entities in the future. For further details of these cases please refer to section titled “Outstanding Litigation, Defaults and Material Development” beginning on page 126.

- 2. One of our promoters was issued a show cause notice by SEBI in 2008. He was subsequently found not guilty in the matter. But there is no assurance that similar proceedings will not be initiated against our Promoters again.**

One of our promoters ‘Mr. Pandoo Prabhakar Naig’ was a part to a show cause notice issued by SEBI in 2008 (EAD/SD/114785/2008 dated January 22, 2008) in matter of trading in the script of M/s Veronica Laboratories Limited. He was issued a show cause notice in the said case for violation of provisions of ‘Prohibition of Fraudulent and unfair Trade Practices Relating to Securities Market’. After a detailed investigation SEBI found him not guilty of violation which was published vide adjudication order no. SD/AO - 06 /2008.

The management cannot provide assurance that similar proceedings will not be initiated against our Promoters or our Group Entities in the future.

- 3. “IPO Grade 1” has been assigned to the proposed public offering of Onelife Capital Advisors Limited by CARE Limited indicating poor fundamentals.**

CARE Limited has assigned an “IPO Grade 1” indicating poor fundamentals, to our proposed initial public offering. The IPO grading report of CARE mentions the weaknesses as:

- Small Size of Operations
- Limited Track Record
- Moderate Management Profile
- Lack of Diversified Revenue Streams
- Lack of Branch Network
- Highly Competitive Industry
- High Dependence on Capital Markets

For further details, please refer to section titled “General Information” beginning on page no 9 of the RHP.

- 4. We have a plan to grow our Portfolio Management Services (PMS) through the proceeds of this issue. A major part of issue proceeds (approximately 35%) are proposed to be utilised for this purpose (Kindly refer to section titled ‘Objects of the Issue’ beginning on page 29). The contribution of this segment to our revenues has been ‘nil’ since inception. While we have identified the cities / locations we intend to begin our business activities, we have not shortlisted the premises from where we will be operating. This may change our project outlays and timelines while rolling out this business service. Moreover there is also a risk relating to the viability of this business due to our inexperience in this business.**

Approximately 35% of the capital raised (at lower price band) from this issue is proposed to be deployed in building of the branch infrastructure, which totals to ₹ 115.78 million for offering Portfolio Management Services. The contribution of this business activity to revenue of company has been ‘nil’ since inception of the company.

We have not identified any premises for the same and the plans are based on our management estimates which have not been verified by any independent consultants. Volatility in real estate prices will affect our operations planning, business profitability and overall viability of this model.

The license to carry on the PMS business has been obtained on December 21, 2010 and our company is yet to commence operations.

As yet, we have not finalised the premises for operating our portfolio management service branches/franchisees. We believe rented premises are easily available and the rates are not expected to vary significantly at this stage. We believe our business activity can be assured that as our choices are limited to metros and mini-metros, and their abundant supply of the same in the rented / lease option. But still we cannot ensure that this will not lead to any time or cost overruns for the projects affecting our businesses.

5. We have a limited operating history and certain of our businesses are yet to be launched. This may restrict our growth due to difficulty in attracting new customers.

Onelife Capital Advisors Limited was incorporated on August 31, 2007 and our actual business operations commenced in September, 2009, which further gained momentum after receiving Merchant Banking License on February 10, 2010. Therefore, we have limited operating history. We are subject to all of the business risks and uncertainties associated with any new business enterprise, including the risk that we will not achieve our objectives and that the value of your investment in the Equity Shares could decline substantially. In addition, we have limited operating results that can demonstrate our ability to build and manage our business.

Moreover, a limited operating history could also restrict our growth due to limited business credentials in the investment banking domain which might act as a deterrent in obtaining new mandates. Similarly, we might find it difficult to attract clients for the Securities Broking Business and Portfolio Management Services due to our inexperience and lack of track record in these areas.

In this Red Herring Prospectus, we have included financial statements only for the period of last four years i.e. 2008, 2009, 2010 and 2011, which are not so sufficient to demonstrate an earnings track record. Further, our actual business operations commenced only in the last financial year and our revenue earned in the periods prior to the filing of the Draft Red Herring Prospectus are not indicative of the potential of this business and the level of revenues we expect from and the expenditure we expect to incur in this business. As a result of the above factors, the financial statements we have presented in this Red Herring Prospectus will not be an accurate estimate of our actual experience as a public company or indicative in any way of our future performance.

6. We have been advised by SEBI for violation under Regulation 6(b), 15 and 28A of SEBI (Merchant Bankers) Regulation, 1992 in the past and there is no assurance that similar or any other advice is not issued or an advice snowballs into a notice resulting into penalties or suspension or termination of our license / licenses.

In the past SEBI has advised us for violation of Regulation 6(b), 15 and 28A of SEBI (Merchant Bankers) Regulation, 1992 through letter dated October 13, 2010. We were advised for failing to inform SEBI about change of compliance officer on time and also repeated changes of the same in a short span of time (Regulation 6(b); 28A). We also missed the deadlines set for submission of half yearly return to SEBI once (15).

This lapse happened due to our oversight. There was a churn in the team managing investment banking operations and compliance division. These lapses might happen again in future and may result in penal action from the regulator, including loss of license to conduct merchant banking activities.

7. There is an Income Tax demand notice against one of our promoters.

Mr. Pandoo Prabhakar Naig, one of our promoters has been served a notice of demand under Section 156 of Income Tax act 1961 by the Indian Income Tax Department on December 28, 2010. This demand amounts to ₹ 175,764,665. Subsequently he has filed an appeal to the Commissioner of Income Tax (Appeals), Mumbai against the above demand amount and is currently under litigation. For further details of this case please refer to the section titled “Outstanding Litigation and Material Development” beginning on page 126.

We do not foresee this development to affect the company business directly, but do however foresee issues of promoter liquidity and availability of time being affected.

8. We have issued the following Equity Shares during the last year at a price that may be lower than the Issue Price to our promoters and promoter group.

Some of our promoters have been issued shares at prices that may be lower than issue price in last one year

Date of Allotment	Name of the Allottee	No. of Equity Shares	Issue Price (₹)	Reason for issue	Whether the Allottee is a part of the Promoter Group
September 3, 2010	Pandoo Prabhakar Naig	500,000	100	Further Allotment	Yes
September 6, 2010	Pandoo Prabhakar Naig	50,000	100	Further Allotment	Yes
November 16, 2010	Thiruvaidaimarudur Krishna Prabhakar Naig	4,400,000	10	Further Allotment	Yes
	Mrs. Radhabai Naig	10,000	10	Further Allotment	Yes
	Mrs. Divya Pandoo Naig	10,000	10	Further Allotment	Yes
	Mrs. Sowmya Deshpande	10,000	10	Further Allotment	Yes
	Mr. Gautam Mohan Deshpande	10,000	10	Further Allotment	Yes
	DGS Agrotech Private Limited	10,000	10	Further Allotment	Yes

For further details of these cases described above, please refer to section titled “Capital Structure” beginning on page 18 of Red Herring Prospectus

9. One of our promoter group entity / concern is also engaged in stock broking. This could lead to conflict of interest which might affect the operations and financials of our company negatively, in case other group companies provide any competitive services or expand their presence in the business in which we are already present or offer services to companies in direct competition with us.

Sai Broking one of our group Firm is Stock Broker of Inter Connected Stock Exchange Of (I) Limited and Sub Broker of National Stock Exchange Of India through Stock Broker ISE Securities & Services Limited. The Firm (Sai Broking) has not been operational since last 3 years. Further, there is no assurance that it would not be made operational on a future date which might lead to a conflict of interest. Similarly, services offered by any other promoter group entity in future can lead to a conflict of interest. There is no assurance that the Group Companies will not provide competitive services or expand their presence in the business in which we are already present or offer services to companies in direct competition with us.

10. We are a new entrant in the Portfolio Management Services and Brokerage Market with no customer base, track record and prior experience. We may find it difficult to start and manage the business and attract customers.

Our company is a new entrant in Portfolio Management Services and Equity Brokerage Industry with no customer base and experience in the field.

Our management team or the core team has limited experience of managing these businesses. We may also find it difficult to establish and run our operations due to lack of prior experience and expertise in managing a business that has to be compliant with all the regulatory bodies. Moreover, it would also be difficult for us to attract and retain customers / investors for doing business as we do not have an established track record in all these areas.

11. If the Company is unable to commence operations as expected, its performance from operations will be adversely affected, which would affect investment of equity investors in our company negatively.

Our company has received the SEBI license for Portfolio Management Services vide certificate dated December 21, 2010. We have also received permission to offer Brokerage Services from the Bombay Stock Exchange Limited on 24th September 2010. We have a finalised business plan and are working towards putting up the necessary infrastructure and teams in place depending on business opportunities and business liquidity. All these activities will have to comply with SEBI regulations and could take significant effort and time. The scheduled commencement target dates for our company's businesses are subject to delays and plans can be materially changed. We may also incur high costs while sourcing the required manpower due to the other opportunities in the industry. There can be no assurance that our Company's businesses will commence in the time expected, or at all, or that their gestation period will not be affected by any or all of these factors. Our Company cannot assure that all potential liabilities that may arise from delays or shortfall in performance will be covered.

12. We may face penalties for delay in commencement of securities brokerage business and we are yet to pay the license fee in full.

As per the license terms of the Bombay Stock Exchange, we would be penalized with a penalty of ₹ 50,000 as we did not start our business operations by December 23, 2010. Further, we have paid the mandatory ₹ 50,000 to BSE, towards SEBI Annual Clearing Membership fees of Derivative Segment for the year 2011-12. We have paid only ₹ 1,00,000 out of the actual fee of ₹ 10,00,000 to be paid to the BSE. This fee would be payable before commencement of our business operations. Non-compliance or inability to pay these fees would result in confiscation of our brokerage license. We have plans to commence these operations at a later date as and when we get the right team members to grow this venture. Till then, we may not operationalise this business activity.

13. We have negative cash flows from operating and investing activities in the fiscal year 2008, 2010 and 2011 and for financing activity for fiscal year 2009. We have also incurred losses during fiscal 2008, 2010 and 2011. Any negative cash flows from operations or losses in the future could adversely affect our results of operations and financial condition of our company.

For fiscal 2008, 2010 and 2011, we had a negative cash flow from operating activities of ₹ 300, ₹ 43.19 million and ₹ 74.01 million respectively. Our cash flow from investing for the same periods is also negative and shows a balance of ₹ -122,360, ₹ -1.49 million and ₹ -30.37 million for the fiscal ended March 31, 2008, March 31, 2010 and March 31, 2011, respectively. Cash flow from financing activities was negative for the fiscal 2009 where it was ₹ -1, 00,000. We suffered losses of ₹ 33,203 in fiscal 2008; ₹ 41,298 in fiscal 2009 and ₹ 6.99 million in fiscal 2011 as per restated accounts.

For the Fiscal 2008 and 2009 cash flows were negative as our business was not operational during that period. Further they have been negative in fiscal 2010 and 2011 as we were in the preliminary stages of setting up our business.

The business profits have been negative during fiscal 2008 and 2009 as our business was not operational. We suffered a loss in Fiscal 2011 too as we had initiated our process of growing our merchant banking activity. This may take time to mature and it is possible that we may not be successful in securing and growing this business all the time.

14. Difficult market conditions can adversely affect our business in many ways, including reduced businesses in all our activities, including the advisory business. Such situations could completely cripple our business operations.

As a financial services firm, our business can materially be affected by adverse and uncertain conditions in both the domestic and global financial markets. During periods of unfavorable market or economic conditions, the volume and value of primary and secondary market transactions may decrease, thereby reducing the demand for our investment banking and advisory services and increasing price competition

among financial services companies seeking such engagements. A market downturn would likely lead to a decline in the volume of transactions that we execute for our customers as well as a decrease in prices. Any decline in transaction volumes would lead to a decline in our revenues received from commissions / fee. Our results of operations would be adversely affected by any reduction in the volume or value of merchant banking and investment banking transactions; Brokerage Income and also affect the potential Portfolio under Management. Our profitability may also be adversely affected by our fixed costs and the possibility that we would be unable to scale back other costs within a time frame sufficient to match any decreases in revenue relating to changes in market and economic conditions. The future market and economic climate may deteriorate because of many factors beyond our control, including rising interest rates, inflation, terrorism or political uncertainty, any global or domestic events including events that may impact liquidity and investment inflows from foreign and domestic investors. Our ability to grow our recent business ventures such as broking and Portfolio Management Services may also be limited in difficult market conditions. Our operating results may vary significantly from quarter to quarter as a result of volatility in market conditions. Therefore, period-to-period comparisons of our results of operations would not be meaningful and should not be relied upon as an indication of our future performance. It is possible that in the future some of our quarterly results of operations may be below the expectations of market analysts and investors, which could lead to a significant decline in the market value of our Equity Shares.

15. Our revenues are dependent on our ability to successfully manage client relationships, conclude advisory assignments and execute transactions. There can be no assurance that we would be able to manage existing relationships well and attract new clients.

Our investment banking clients generally retain us on a short-term, engagement-by-engagement basis in connection with specific capital market transactions, rather than on a recurring basis under long term contracts. As these transactions are typically singular in nature and our engagements with these clients may not recur. We must seek out new engagements when our current engagements are successfully completed or are terminated. As a result, high activity levels in any period are not necessarily indicative of continued high levels of activity in any subsequent period. If we are unable to generate a substantial number of new engagements and generate fees from the successful completion of transactions, our business and results of operations would likely be adversely affected.

The fees earned by our financial advisory business are typically payable upon successful completion of a particular transaction or financial advisory assignment. A decline in our financial advisory engagements or the market for advisory services would adversely affect our business. Our financial advisory business operates in a highly competitive environment where typically there are no long-term contracted sources of revenue. Every business engagement typically is separately solicited, negotiated and awarded. As a consequence, our fee-paying engagements with many clients are not predictable and high levels of financial advisory revenue in any accounting period are not necessarily predictive of continued high levels of financial advisory revenue in future periods. In addition to the fact that most of our financial advisory engagements are single, non-recurring engagements, we may lose clients each year as a result of a client's decision to retain other financial advisors due to reasons like the sale, merger or restructuring of a client, a change in a client's senior management and various other causes. As a result, our financial advisory revenue could decline materially due to such changes in the volume, nature and scope of our engagements. Although we believe that we can win new clients, if some of our larger clients depart or reduce their business with us, there can be no assurance that in such circumstances we will be able to attract large new clients or do so quickly enough to avoid an adverse effect on our business and results of operations.

16. Our Promoters will continue to hold a majority of our Equity Shares after the Issue and can significantly influence our corporate actions.

Following the completion of the Issue, our Promoters and Promoter Group entities will own an aggregate of 74.93% of our issued and paid-up Equity Share capital. They have, and will continue to have, considerable influence over our business and may take actions that do not reflect the will or best interests of other shareholders. The promoter group has the ability to control our business including matters relating to any sale of or substantially all of its assets, further issuance of shares or other securities, significant amendments to our articles of association, the timing and distribution of dividends and the election or

termination of appointment of its officers and directors. By virtue of its shareholding, the promoter group can exercise substantial influence over the Board and over matters that are subject to a shareholder vote.

This control could delay, defer or prevent a change in control of Onelife Capital Advisors Limited impede a merger, consolidation, takeover or other business combination involving Onelife Capital Advisors Limited, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of Onelife Capital Advisors Limited even if it is in the best interest of its shareholders. Our Promoters and / or the members of our Promoter Group will also continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests and / or the interests of our minority shareholders, and there can be no assurance that such actions will not have an adverse effect on our future financial performance and the price of our Equity Shares. For further details, please refer to the sections titled “Capital Structure”, “History and Other Corporate Matters”, “Our Promoters and their Background” and “Our Promoter Group” beginning on pages 18, 65, 80 and 82 respectively.

17. The funding requirements of our Company and the deployment of the proceeds of the Issue are based on management estimates and have not been independently appraised by any bank or financial institution.

The funding requirements of our Company and the deployment of the proceeds of the Issue are based on management estimates and have not been appraised by any bank, financial institution or other independent institution. In view of the highly competitive nature of the industry in which we operate, we may have to revise our management estimates from time to time and consequently our funding requirements may also change. This may result in the rescheduling / change of our fund deployment programmes and an increase or decrease in our proposed expenditure for a particular object and our results of operations may be adversely impacted. Our management will have significant flexibility in applying the proceeds received by us from the Issue. We intend to rely on our internal systems and controls to monitor the use of such proceeds. Further, we have not identified the general corporate purposes for which we intend to utilise a portion of the Net Proceeds of the Issue. For further details, please refer to the section titled “Objects of the Issue” beginning on page 29.

In the event that our Promoter Group entities incur losses and have negative networth or continue to incur losses and negative networth in the future, it may have an adverse impact on our results of operations and financial condition will continue to be adversely affected. For further details, please refer to the section titled “Our Promoter Group Entities” beginning on page 84 of this Red Herring Prospectus

19. We rely on third parties to conduct certain business activities and any interruption of such services could impair the quality of our services and / or constrain our growth.

In carrying out our obligations under the investment management and / or advisory agreements to which we are party, we will procure the services of various third party advisers, including third party valuation experts, property agents, surveyors, environmental consultants, lawyers, accountants, registrar and syndicate members. Any deterioration in their performance in any count would impair our quality of service. This would not only make us vulnerable to litigation but also lead to loss of repute and business. Sometimes, this could even lead to severe crippling of our business.

20. We face strong competition from other financial services firms.

Investment banking, Equity Brokerage and PMS industry are intensely competitive and we expect them to remain so. We compete on the basis of a number of factors, including client relationships, reputation, the abilities and past performance of our professionals, market focus and the relative quality and price of our services and products. Pricing and other competitive pressures in investment banking, including the trends toward multiple book runners, co-managers and multiple financial advisors handling transactions, have continued and could adversely affect our revenues, even during periods where the volume and number of investment banking transactions are increasing.

We are a relatively small investment bank with a limited history where we have just started our operations on February 10, 2010. Many of our competitors in the investment management, investment banking have a broader range of products and services, greater financial and marketing resources, larger customer bases, greater name recognition, more senior professionals to serve their clients’ needs, greater global reach and more established relationships with clients than we have. These larger and better capitalized competitors may be better able to respond to changes in the investment banking industry to compete for skilled professionals, to finance acquisitions, to fund internal growth, to withstand adverse market conditions and to compete for market share generally. The scale of our competitors has increased in recent years as a result of substantial consolidation among companies in the investment management and investment banking industries.

In addition, a number of large commercial banks, insurance companies and other broad-based financial services firms have established or acquired underwriting or financial advisory practices and smaller investment managers have been merged; taken over or replaced by bigger investment managers. These firms have the ability to offer a wider range of products than we do, which may enhance their competitive position. They also have the ability to support investment banking with commercial banking, insurance and other financial services in an effort to gain market share, which has resulted, and could further result, in pricing pressure in our businesses. In particular, the ability to provide financing has become an important advantage for some of our larger competitors and, because we do not provide such financing, we may be unable to compete as effectively for clients in a significant part of the investment banking market. If we are unable to compete effectively with our competitors, our business, financial condition and results of operations will be adversely affected.

21. Pricing and other competitive pressures may impair the revenues and profitability of our business.

We have the ability to source and successfully execute investment banking mandates and are fairly sure of commencing our securities broking and portfolio management business and attracting clients for the same. We believe we may experience competitive pressures in these and other areas as some of our competitors seek to obtain market share by competing on the basis of price. In addition, we face pressure from our larger competitors, which may be better able to offer a broader range of complementary products and services to clients in order to win their business. If we are unable to compete effectively with our competitors in these areas, revenues may decline, and our business / financial condition and the results of operations may be adversely affected.

22. We are subject to extensive securities regulation and any failure to comply with these regulations could subject us to penalties or sanctions.

The securities industry and our business are subject to extensive regulation by the SEBI and other governmental regulatory authorities. We are also regulated by industry self-regulatory organizations, stock exchanges and other intermediaries, including the BSE, NSE, NSDL and CDSL. The regulatory environment in which we operate is also subject to change and we may be adversely affected as a result of new or revised legislation or regulations imposed by the SEBI, other governmental regulatory authorities or self-regulatory organizations.

Compliance with many of the regulations applicable to us involves a number of risks, particularly in areas where applicable regulations may be subject to varying interpretation. The requirements imposed by securities regulators are designed to ensure the integrity of the financial markets and to protect customers and other third parties who deal with us. Consequently, these regulations often serve to limit our activities, including through capital adequacy, credit concentration and market conduct requirements. We are also subjected to periodic reviews, requests for submission of information, audit and inspections from various regulatory agencies. Furthermore, we are required to incur substantial costs to monitor compliance and comply with such regulations.

If we are found to have violated an applicable regulation, administrative or judicial proceedings may be initiated against us that may result in censures, fines, trading bans, deregistration or suspension of our business licenses, the suspension or disqualification of our officers or employees, or other adverse consequences. We could also be subject to constraints or conditions on operating our business activities and may incur fines, receive regulatory cautions or show cause notices and be barred from engaging in certain business activities. The imposition of any of these or other penalties or restrictions could have a material adverse effect on our business, reputation, financial condition and results of operations. There can be no assurance that the laws governing the Indian financial services sector will not change in the future or that such changes would not adversely affect our business and future financial performance. We may also be adversely affected by changes in the interpretation or enforcement of existing laws and rules by these governmental authorities and self-regulatory organizations. We face the risk of significant intervention by regulatory authorities in all jurisdictions in which we conduct our business. Among other things, we could be fined, prohibited from engaging in some of our business activities or subject to limitations or conditions on our business activities.

23. Our exposure to legal and regulatory liability is significant. We may also face monetary penalties.

We face significant legal risks in our business. The volume and amount of damages claimed in litigation against financial intermediaries is increasing. These risks include potential liability under securities or other laws for materially false or misleading statements made in connection with securities and other transactions, potential liability for advice we provide to participants in corporate transactions and disputes over the terms and conditions of complex trading arrangements. We cannot assure you that we will be successful in claiming a valid due diligence defense or we will not be subject to adverse decisions by the judiciary in this regard.

In our business, we are increasingly exposed to claims for recommending investments that are not consistent with a client's investment objectives. During a prolonged market downturn, such types of claims may arise. These risks often may be difficult to assess or quantify and their existence and magnitude often remain unknown for substantial periods of time.

24. Strategic investments / acquisitions and joint ventures may result in additional risks and uncertainties in our business.

We intend to grow our business through both internal expansion and through strategic investments, acquisitions or joint ventures. While making strategic investments or acquisitions or enter into joint ventures, we face numerous risks and uncertainties combining or integrating businesses, including integrating relationships with customers, business partners and internal data processing systems. In the case of joint ventures, we are subject to additional risks and uncertainties in that we may be dependent upon, and subject to liability, losses or damage to our reputation relating to, systems, controls and personnel that are not under our control.

In addition, conflicts or disagreements between us and our joint venture partners may negatively impact our businesses. Future acquisitions or joint ventures by us could entail a number of risks, including problems with the effective integration of operations, the inability to maintain key pre-acquisition business relationships and integrate new relationships, the inability to retain key employees, increased operating costs, exposure to unanticipated liabilities, risks of misconduct by employees not subject to our control, difficulties in realising projected efficiencies, synergies and cost savings, and exposure to new or unknown liabilities.

Any future growth of our business may require significant resources and / or result in significant unanticipated losses, costs or liabilities. In addition, expansions, acquisitions or joint ventures may require significant managerial attention, which may be diverted from our other operations.

25. Our risk management policies and procedures may not be able to contain unidentified or unanticipated risks.

Our risk management strategies and techniques may not be fully effective in mitigating our risk exposure in all market environments or against all types of risk. We are exposed to the risk that third parties that owe us money, securities or other assets will not perform their obligations. In the upcoming businesses of Security Broking and Portfolio Management Services we would also become prone to additional market risk and other related risks.

Risk management policies and procedures that we utilise with respect to committing our capital in the business with respect to investment banking, trading activities and investment advisory services activities may not protect us or mitigate our risks from those activities. If any of the variety of processes and strategies we utilize to manage our exposure to various types of risk are not effective, we may incur losses.

26. Our business requires us to obtain and renew certain registrations, licenses and permits from government and regulatory authorities and the failure to obtain and renew them in a timely manner may adversely affect our business operations.

Our business operations require us to obtain and renew from time to time, certain approvals, licenses, registrations and permits. The issuance or renewal of these approvals, licenses, permits, registrations are at the discretion of concerned regulatory authorities. Further, we may be subject to penalty or other such actions as the regulatory authorities may deem fit. In addition, we require certain approvals, licenses, registrations and permissions under various regulations, guidelines, circulars and statutes regulated by authorities such as the SEBI, the Stock Exchanges and certain other regulatory and government authorities, for operating our business.

In particular, we are required to obtain a certificate of registration for carrying on each of our business activities from SEBI and other such regulatory authorities that are subject to numerous conditions. If we fail to maintain such registrations and licenses or comply with applicable conditions, or a regulator claims we have not complied, with these conditions, our certificate of registration for carrying on a particular activity may be suspended and / or cancelled and we will not then be able to carry on such activity. This could materially and adversely affect our business, financial condition and results of operations.

We cannot assure you that we will be able to obtain approvals in respect of such applications or any application made by us in the future. For more information about the licenses required in our business and the licenses and approvals applied for, please refer to the sections titled “Key Industry Regulations and Policies” and “Government Statutory and Business Approvals” beginning on page 59 and 128 respectively.

27. Employee / management misconduct could harm our business and is difficult to detect and deter.

There have been a number of highly publicized cases involving fraud or other misconduct by employees in the financial services industry in recent years and we run the risk that employee misconduct could occur at our company. Misconduct by employees could involve the improper use or disclosure of confidential information, which could result in regulatory sanctions and serious harm to our financial results and reputation. Our advisory business often requires that we deal with client confidences of the greatest significance to our clients, improper use of which may have a material adverse impact on our clients.

Any breach of our clients' confidences as a result of employee misconduct may impair our ability to attract and retain advisory clients. It is not always possible to deter employee misconduct and the precautions we take to detect and prevent this activity may not be effective in all cases. We cannot assure any kind of misconduct that would not occur in the future, which could have an adverse effect on our reputation, business prospects and results of operations.

28. We may be unable to adequately protect our intellectual property since our trademarks, logos and other intellectual property are currently not registered and therefore do not enjoy any statutory protection. Furthermore, we may be subject to claims alleging breach of third party intellectual property rights.

Currently, we have not secured registration for our trademark “ONELIFE- One Solution” under the Trade Marks Act, 1999, and consequently do not enjoy the statutory protections accorded to a trademark registered in India. Onelife Capital Advisors Limited has made an application for registration. The registration of any trademark is a time-consuming process, and there can be no assurance that any such registration will be granted. In the absence of such registration, competitors or other companies may challenge the validity or scope of our intellectual property. Unless our logo is registered, we may only get passing off relief for our marks if used by others, which could materially and adversely affect our brand image, goodwill and business.

29. We encounter intense competition for hiring qualified professionals from other investment banking firms. Our failure to attract qualified professionals and retain our existing professionals may materially impede the success and growth of our business.

People are our most valuable resource. Our ability to secure and grow our business on a sustainable basis depends upon the reputation, judgment, business generation capabilities and project execution skills of our professionals. Our professionals' reputations and relationships with our clients are a critical element in obtaining and executing client engagements as well as other business from them.

We encounter intense competition for qualified professionals from other companies in the investment banking, brokerage and portfolio management industry. The departure or other loss of our key professionals who manage substantial client relationships or who possess substantial experience and expertise could impair our ability to secure or successfully complete engagements, which could materially adversely affect our business and results of operations. In the past, we have not been able to prevent our key resources from leaving us which might happen again due to the intense rivalry in the industry for trained resources.

30. We are highly dependent on our management team and key personnel for growth. Any loss of key resources may adversely affect our business performance.

Our business is dependent upon a core management team which oversees the day-to-day operations, strategy and growth of our business. Our success is largely dependent on the management team which ensures the implementation of our strategy. If one or more members of our key management team are unable or unwilling to continue in their present positions, such persons would be difficult to replace and our business, prospects, financial condition and results of operations could be adversely affected. In addition, our success in expanding our business will also depend, in part, on our ability to attract, retain and motivate appropriately qualified personnel.

Our failure to successfully manage our personnel needs could materially adversely affect our business, prospects, financial condition and results of operations. These risks could be heightened to the extent we invest in businesses or geographical regions in which we have limited experience. If we are not able to address these risks, our business, prospects, financial condition and results of operations could be adversely affect our business.

31. We rely extensively on our information technology systems and their failure could harm our relationship with customers and expose us to lawsuits or administrative sanctions or otherwise adversely affect our provision of service to customers and our internal operations.

As part of our business strategy, we use our information systems, databases, communication devices and the Internet to deliver services to interact and perform transactions on behalf of our customers. Although we believe this approach is highly cost-effective, we depend extensively on the capacity and reliability of the systems supporting our operations. To date, we have not experienced widespread disruptions of service to customers, but there can be no assurance that we will not encounter disruptions in the future due to substantially increased numbers of customers and transactions or for other reasons.

If we experience system interruptions, errors or downtime (which could result from a variety of causes, including changes in client use patterns, technological failure, changes to systems, linkages with third-party systems and power failures) or are unable to develop necessary technology, our business, prospects, financial condition and results of operations could be materially adversely affected. Our hardware and software are also subject to damage or incapacitation by human error, natural disasters, power loss, sabotage, computer viruses and similar events or the loss of support services from third parties such as Internet backbone providers. We may encounter delays or other difficulties incorporating new services and businesses into our information technology systems and there can be no assurance that we will realise the efficiencies and other benefits we anticipate from doing so.

The company has a policy where the administrator takes back-up of all the electronic data stored on the servers at regular intervals. This data backup is also stored at a remote location for exigencies.

32. We may face damage to our professional reputation and may also result into legal liability to our clients and affect third parties if our services are not regarded as satisfactory.

We depend to a large extent on our relationships with our clients and our reputation for integrity and high-caliber professional services to attract and retain clients. As a result, if a client is not satisfied with our services, it may be more damaging in our business than in other businesses. Moreover, our role as advisor to our clients on important structured finance transactions involves complex analysis and the exercise of professional judgment. Our activities may subject us to the risk of significant legal liabilities to our clients and aggrieved third parties, including shareholders of our clients who could bring securities class actions against us. In recent years, the volume of claims and amount of damages claimed in litigation and regulatory proceedings against financial intermediaries have been increasing.

These risks often may be difficult to assess or quantify and their existence and magnitude often remain unknown for substantial periods of time. Our engagements typically include broad indemnities from our clients and provisions to limit our exposure to legal claims relating to our services, but these provisions may not protect us or may not be enforceable in all cases. As a result, we may incur significant legal expenses in defending against litigation. Substantial legal liability or significant regulatory action against us could have material adverse financial effects or cause significant harm to our reputation, which could seriously harm our business prospects.

33. Being a relatively young company, we may require further equity issuance, which may lead to dilution of equity and may affect the market price of our Equity Shares. Our company may not be able to procure additional funds through debt to satisfy the business needs.

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the net proceeds of this Issue and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional debt in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain, additional capital requirements imposed due to changes in regulatory regime or new guidelines, or significant depletion in our existing capital base due to unusual operating losses.

Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favorable to the then existing shareholders of the Company. If we decide to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favor of lenders.

We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be adversely affected if we are unable to implement our expansion strategy.

34. Our operations involve many risks. We may not have sufficient insurance cover to recover any economic losses as well as other risks pertaining to claims by third parties and litigation.

Operating financial services involves many risks and hazards which may adversely affect our profitability, including breakdown, failure or substandard performance of network equipment, third party liability claims, employee frauds, infrastructure failure and terrorist activities. We maintain insurance coverage with respect to our infrastructure that we believe is customary for the financial services industry in the markets in which we operate. Further, we have no coverages in certain circumstances including those involving

claims by third parties and litigation. We are also exposed to potential liability risks that are inherent in the provision of financial services. As on date of filing of RHP we have 2 insurance policies covering Fire and Special Perils and Burglary amounting to ₹ 6,00,00,000. For more details, please refer to the section entitled “Business - Insurance” on page 58.

We cannot assure you that the operation of our business will not be affected by any of the incidents and hazards listed above. If our arrangements for insurance or indemnification are not adequate to cover claims, including those exceeding policy aggregate limitations or exceeding the resources of the indemnifying party, we may be required to make substantial payments and our financial condition and results of operations may be adversely affected.

35. We have entered into a number of related party transactions.

We have entered into a number of related party transactions. Such transactions or any future transactions with related parties may potentially involve conflicts of interest and impose certain liabilities on our Company. There can be no assurance that no such transactions would be entered into in future or have an adverse effect on our financial condition and results of operations. For more information regarding our related party transactions, see “*Financial Statement - Statement of Related Party Transaction*” on page number 110

36. Fluctuations in operating results and other factors may result in decreases of our Equity Share price.

Stock markets have experienced extreme volatility that has often been unrelated to the operating performance of particular companies. These broad market fluctuations may adversely affect the trading price of our Equity Shares. There may be significant volatility in the market price of our Equity Shares. If we are unable to operate profitably as we have in the past, investors could sell our Equity Shares when it becomes apparent that the expectations of the market may not be realised, resulting in a decrease in the market price of our Equity Shares.

In addition to our operating results, the operating results of other financial services companies, changes in financial estimates or recommendations by analysts, governmental investigations and litigation, speculation in the press or investment community, the possible effects of a war, terrorist and other hostilities, changes in general conditions in the economy or the financial markets, or other developments affecting the financial services industry, could cause the market price of our Equity Shares to be issued to fluctuate substantially.

37. We operate our business from a leased premise.

Our office through which we operate our business, i.e. our registered and corporate office, is a leased premise. We may in future also enter into such transactions with third parties. Any adverse impact on the title / ownership rights / development rights of our landlords from whose premises we operate our offices or breach of the contractual terms of such leave and license agreements may impede our Company's effective operations. In the event, these leases are not renewed, our operations and in turn our profitability will be adversely impacted. We intend to purchase a new premises to augment the current premises which is one of our objects to raise fund from the public. For further details, please refer to the section titled "Objects of the Issue" beginning on page 29.

38. Our success is dependent upon the implementation of our strategic plans and if we are unable to implement these plans, our business, results of operations and financial condition could be materially and adversely affected.

Our strategic plan is to focus on strengthening and extending our investment banking business and grow the other business on the way using the synergies to strengthen all three businesses. Expansion of our business to advise on a broader range of investments and to offer a wider range of products and services to a broader customer base exposes us to a number of risks and challenges, including, among others, the following:

- Imperfect information about investments or potential customers in new sectors;
- Less growth or profit potential in new lines of business than we anticipate;
- Greater marketing and compliance costs;
- Inability to identify attractive investments and offer new services in a timely fashion, putting us at a competitive disadvantage;
- Greater experience and resources with the competitors in our existing and proposed business activities;
- The necessity of hiring or retraining capable personnel to supervise and conduct the relevant new business activities, particularly in the area of Equity Brokerage and risk management; and
- The need to enhance the capability of information technology systems to support a broader range of activities and an increased retail financial services customer base. Any failure to manage such business risks may cause us to incur increased liabilities.
- Moreover, our inability to successfully integrate and extract value from newer products could adversely affect our business, results of operations and financial condition.

39. If we are unable to source and implement our business strategy well, we may be unable to achieve our strategic objectives.

Our management is responsible for managing and implementing our business strategy. Accordingly, our success will depend on our management team's ability to identify, evaluate and recommend future growth for our company. Competition from other investment banks and brokerage firms is one of the hurdles that we face in path of growth. We need to provide proper strategic and managerial assistance and access to future resources. If we are unable to cope up with the current market trend and competition, this could have a materially adverse effect on our business, results of operations and financial condition.

EXTERNAL RISK FACTORS

1. Currency exchange rate fluctuations may affect the value of the Equity Shares.

The cross currency conversion rate has been volatile in recent years and it may fluctuate substantially in the future. Fluctuation of exchange rate between Indian rupee and other major currencies in the world may affect the value of your investment in our equity shares.

2. Any change in the pace of economic activity in the world may have significant impact on India and thus our business.

We currently operate in Indian markets and our performance is directly correlated with growth of Indian economy. In the recent times India has seen significant Capital Inflows from the rest of world. These flows have been both direct into the industry as well as in the securities market and have had substantial impact on Indian economy. Moreover the happenings in the world today impact India more via international trade balance; banking relations and slowdown of capital flows. Any change in the pace of economic activity of the world similar to that of 2008 would have a profound impact on rate of growth of Indian economy impacting consumption, investment, and thus growth rate of economy.

Our business which is majorly dependent on investment demand of Indian corporates, would suffer if there is a negative change in pace and vice versa.

3. A slowdown in economic growth in India would affect our business.

We currently operate primarily in the domestic Indian market, and our performance is intertwined with the overall economy, the GDP growth rate and the economic cycle in India. The Indian economy could be adversely affected by a number of factors both global and local. The international factors may vary from change in prices of essential commodities like Crude Oil and Iron Ore to change in interest rates in a developed nation to crises of political or economic nature. Similarly, domestic factors might vary from changing government policies to monsoons. All these factors can affect our business in a favorable or unfavorable way. Any slowdown, volatility, crises related to weather, rating down grade etc. might affect Indian economy negatively creating a slowdown, which in turn would affect the performance of our business adversely in short, medium or long term.

4. Our performance is linked to the political situation in the country as it affects the regulatory framework for our business.

The role of the Indian central and state governments in the economy has remained significant over the years. Since 1991, the Government has pursued policies of economic liberalisation, including significantly relaxing restrictions on the private sector. There can be no assurance that these liberalisation policies will continue in the future. The rate of economic liberalisation could change, and specific laws and policies affecting financial services companies, foreign investment, currency exchange rates and other matters affecting investments in Indian companies could change as well. A significant change in India's economic liberalisation and deregulation policies could disrupt business and economic conditions in India, thus affecting our business. The current Government is a coalition of several parties. The withdrawal of one or more of these parties could result in political instability. Any political instability could delay the reform of the Indian economy, which could materially adversely impact our business.

5. Terrorist / Naxalite attacks / war / conflicts where we operate or where our clients and customers are located could adversely affect the financial markets and adversely affect our business.

Terrorist / Naxalite attacks and other acts of violence, war or conflicts, particularly those involving India, or another part of the world where we operate or may operate or our client may operate, may adversely affect Indian and worldwide financial markets. Such acts may negatively impact business sentiment, which could adversely affect our business and profitability. India has from time to time experienced, and continues to experience, social and civil unrest, terrorist attacks and hostilities with neighboring countries. Also, some

of India's neighboring countries have experienced, and is currently experiencing similar situations including internal unrest. Such social or civil unrest or hostilities could disrupt communications and adversely affect the economy of such countries.

Such events could also create a perception that investments in companies such as ours involve a higher degree of risk than investments in companies in other countries. This, in turn, could have material adverse effect on the market for securities of such companies, including our Equity Shares. The consequences of any armed conflicts are unpredictable, and we may not be able to foresee events that could have an adverse effect on our business.

6. Natural calamities could have a negative impact on the Indian and other economies conditions, which will affect our business.

Not just India, but many countries throughout the world have experienced natural calamities such as earthquakes, floods, droughts and a tsunami in recent years. Some of these countries have also experienced pandemics, including the outbreak of Swine flu. The extent and severity of these natural disasters and pandemics determines their impact on these economies. Prolonged spells of abnormal and excessive rainfall and other natural calamities could have an adverse impact on the economies in which we have operations, which could adversely affect our business and the price of our Equity Shares.

7. Investing in securities that carry emerging market risks can be affected generally by volatility in the emerging markets.

The markets for securities bearing emerging market risks, such as risks relating to India, are, to varying degrees, influenced by economic and securities market conditions in other emerging market countries. Although economic conditions differ in each country, investors' reactions to developments in one country may affect securities of issuers in other countries, including India. Accordingly, the price and liquidity of the Equity Shares may be subject to significant fluctuations, which may not necessarily be directly or indirectly related to our financial performance.

8. We will need final listing and trading approvals from the BSE and the NSE before trading commences.

The Equity Shares are new issues of securities for which there is currently no trading market. Our Company will apply to the BSE and NSE for final listing and trading approvals after the allotment of the Equity Shares in the Issue. There can be no assurance that we will receive such approvals on time or at all. Any adverse revision to India's credit rating for domestic and international debt by rating agencies may adversely impact our ability to raise additional financing for our clients as well as us. SECTION III - INTRODUCTION

SUMMARY OF THE INDUSTRY

The information in this section is derived from a combination of various official and unofficial publicly available materials and sources of information. It has not been independently verified by the Company, the Book Running Lead Manager or their respective legal advisors, and no representation is made as to the accuracy of this information, which may be inconsistent with information available or compiled from other sources.

Indian Economy

Indian economy has registered a growth of 8.5 per cent in 2010-11, as against 8.6 per cent in advance estimates. The downward revision in the GDP growth rate is mainly on account of lower performance in mining & quarrying, manufacturing & trade, hotels, transport, & communication and financing, insurance, real estate & business services than anticipated. Economic activities which showed significant growth in 2010-11 over the corresponding period last year were agriculture, forestry & fishing (6.6 per cent), construction (8.1 per cent), trade, hotels, transport & communications (10.3 per cent) and insurance, real estate & business services (9.9 per cent). (Source: MOSPI) This growth rate according to estimates of various organisations is expected to taper off in Fiscal 2012 due to increasing inflationary pressure and spiralling interest rates.

Indian Capital Market

India has a transparent, technology enabled and well regulated Capital Market. Capital Markets achieve one of the most important functions of channeling idle capital resources to productive resources or from less productive objects to more productive resources. The capital market transactions involve lots of checks and balances with efficient electronic trading and settlement systems. The stock markets have a range of players including mutual funds, FIIs, hedge funds, corporate and other institutions. Domestic savings and capital inflows are channelised in the capital markets. The flow of resources in the securities market depends on the depth and efficiency of the markets, robust risk management system, attractiveness of securities and the ability of the users of capital to attract resources.

Securities and Exchange Board of India (SEBI) regulates the Indian capital markets. There are 24 exchanges (including active and non active exchanges) in the country, which offer screen based trading system. The trading system is connected using the VSAT technology. BSE is one of the oldest exchanges in Asia. National Stock Exchange (NSE) is forth largest exchange in the world in terms of number of trades. These exchanges constitute an

organized market for securities issued by the Central and State Governments, public sector companies and public limited companies. The stock exchanges provide an efficient and transparent market for trading in equity, debt instruments and derivatives. The stock exchanges are demutualised, and have been converted into companies now, in which brokers only hold minority share holding. In addition to the SEBI Act, the Securities Contracts (Regulation) Act, 1956 regulates the stock markets.

Primary Market

Primary markets create a flow of new securities to the securities market. This is achieved through public offerings of debt or equity or a composite structure of debt and equity to the investors. Here the issuer of securities raises the capital to meet their fund requirements.

Primary market offerings could either be in the form of public offerings or private placements. The issuers here could include Corporate, Government, Municipal Corporations and in some cases existing shareholders and Institutional Investors offering their securities for sale.

The product offerings by intermediaries in the primary markets include management of IPOs of issuers, mobilization of resources from retail and institutional investors, private placement of issues, debt syndications etc. Intermediaries in the primary market include merchant bankers, registrars and brokers.

Secondary Market

Secondary markets provide a medium of exchange and enable investors to trade in the securities. An efficient securities market distinguishes financial investments from various forms of other illiquid investments. Stock Exchanges provide the platform and the mechanism for effecting transactions between different market participants. Secondary market comprises of trading in equities, bonds and derivatives. The depth of the market is determined by number of factors such as liquidity of the instruments traded, number of market participants, types of instruments traded, settlement practices etc. A variant of the secondary market is the forward market, where securities are traded for future delivery and payment. Presently only two exchanges viz., NSE and BSE provide trading in the Futures & Options.

Wholesale Debt Market (WDM) Segment

In the WDM segment, all government securities, state development loans and treasury bills are 'deemed' listed as and when they are issued. Other than those mentioned above, all eligible debt securities whether publicly issued or privately placed can be made available for trading in the WDM segment. Amongst other requirements, privately placed debt paper of banks, institutions and corporates require an investment grade credit rating to be eligible for listing. As at end March 2010, 4140 securities with issued capital of ₹ 31,50,880 crore and a market capitalisation of ₹ 31,65,929 crore were available for trading on the WDM segment.

Equity Broking

As the Indian capital markets continue to evolve, they are undergoing rapid consolidation driven by increased trading volumes, increased regulation, customer sophistication, availability of better technology and increased back-office requirements. As a result, significant changes have been introduced to strengthen risk management systems. Changes in the regulatory framework and settlement mechanics have resulted in smaller operating players losing market share, leading to consolidation in the industry.

Market consolidation is even more pronounced in the on-line trading category where the top five brokers control a very significant share in the market. The rapid growth in on-line trading volumes can be attributed to the growing sophistication of retail investors, availability of reliable internet connectivity and the sophistication of the internet trading products. At the end of March 2010, a total number of 363 members were permitted to allow investor's web based access to NSE's trading system. The members of the exchange in turn had registered 51,43,705 clients for web based access as on March 31, 2010.

Illustration of Book Building and Price Discovery Process (Investors should note that this example is solely for illustrative purposes and is not specific to the Issue)

Bidders can bid at any price within the price band. For instance, assume a price band of ₹ 20 to ₹ 24 per share, issue size of 3,000 equity shares and receipt of five bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the bidding centres during the bidding period. The illustrative book below shows the demand for the shares of the issuer company at various prices and is collated from bids received from various investors.

Bid Quantity	Bid Price (₹)	Cumulative Quantity	Subscription (%)
500	24	500	16.67
1,000	23	1,500	50.00

2,000	21	5,000	166.67

Development of Portfolio Management Services

Our company proposes to develop our Portfolio Management Services business across India, through effective distribution channels. As per our internal estimates, we require about 16,000 sq ft of built up area for setting up branches on lease basis for rendering Portfolio Management Services.

The estimated cost for establishment of a typical branch office primarily would comprise of advance rent and deposit for lease/license arrangements, broker commissions, investment into furniture and fixtures, installation of computers and other office equipments. Since the equipments are standard in nature, the estimated costs remain largely the same for similar sized offices for each business, irrespective of the location of the office. However, the rents and deposits for lease/license arrangements and expenses towards furnishing may vary slightly based on location, size and several other factors.

Brand Building

Financial services are driven by trust, value addition and credibility. We are a young and growing company. So, it becomes all the more important to ensure that our potential clients, employees and other indirect stakeholders appreciate our offerings and support our business activities. It is also critical to showcase our successfully delivered assignments to future customers. All these aspects result into our company providing paramount focus into making our business into a lasting valuable enterprise.

“Onelife”, implies one chance. In everything we do, we have a choice and in our context, it is ‘we will make it happen’. Immense opportunities, competitive pressures, partial informations result in a need for us to make a choice. It is in this situation that our company wishes to make a difference by becoming a “Solutions” driven company. Always willing to go through that extra bit of effort to make a positive difference to our clients, we strive to be

Thus, “Onelife” represents Value, Reliability and Service. Our strategic intent is to make this company a well recognized and quality player in our industry.

Going forward, OCAL believes that brand building is an important element in our business growth strategy. We will be focusing on building our brand in two buckets. The principal one would be at the corporate level as a generic brand – **Onelife**. We intend to leverage this branding exercise to source talent, attract business opportunities and nurture a positive recall for our services amongst our clients. This would be an ongoing exercise. Most of our branding and marketing acts would be client segment specific, but on a recurring and multi-year basis. We have earmarked a budget of Rs 15 Million per year for the next three years for this purpose as a minimum necessary investment, totalling to Rs 45 Million. Most of these expenses would be in terms of event sponsorships, advertisements in trade publications and creating networking events. The motive would be build-on business opportunity for our enterprise from a long term perspective.

The second bucket of investments is into our business verticals. Specifically, in terms of different consumer bases being targeted with sub-brands/ specific services/ products. It would initially be merchant banking activity promotions and later on portfolio management services. In merchant banking services, we intend to invest Rs 4 Millions per annum aggregating to Rs 12 millions by the end of year 3. Similarly for portfolio management services, we intend to spend Rs 10 Million per annum for the next two years in terms of investor conferences and service branding in local target markets.

Policy Initiative

With gradual exit from the fiscal stimulus measures through the partial rollback of indirect tax cuts and compression in the growth of non-plan expenditure, the Central Government resumed the process of fiscal consolidation during 2010-11. With these measures, alongside the expected higher growth in GDP, Revenue Deficit (RD) and Gross Fiscal Deficit (GFD) are envisaged to be brought down during 2010-11(BE) over the preceding year.

The correction in deficit indicators has been envisaged in the Union Budget for 2010-11 to come through a combination of factors, viz., higher revenue receipts, greater disinvestment proceeds, and curtailment of growth in revenue expenditure, especially in the non-plan component. Revenue collections from 3G/BWA spectrum auctions have turned out to be ₹ 1,06,262 crore, more than three times of the budgeted amount of ₹ 35,000 crore in the Union Budget for 2010-11. As a result, the non-tax revenue receipts are expected to go up by 48 per cent from the budgeted level. This additional mobilization of resources, unless utilised for expanding expenditure, would result in an additional 1.0 percentage point reduction in both RD and GFD, compared to what has been envisaged in the Budget estimates of 2010-11, and thereby create more space for private investment.

The decision taken in June 2010 to deregulate petrol prices and revise the prices of other petroleum products upwards would also help in containing the pressure on the fiscal situation, besides contributing to medium-term fiscal sustainability. Some of the tax measures announced in the Union Budget for 2010-11, such as increase in income tax slabs and the indirect tax measures, viz., concessional customs duty, exemption of excise duty and service tax would have positive impact on the private consumption and investment demand. Direct tax collections during April-June 2010 have registered strong growth reflecting, *inter-alia*, the rebound in economic activity recovery in the first quarter of 2010.

These changes have not only increased the awareness of retail investors but also increased confidence level of both domestic and international investors on the Indian equity markets.

In the post recession world, Indian banking system and regulators are considered to be the best in the world whose policies helped India tide the entire recession with minimal impact on the intrinsic growth.

Changing demographic profile and increased per capita income has left consumer with more saving with higher propensity to invest.

These changes over the years have helped in increasing the market depth in daily trading quantities which has also translated into higher number of transactions in the primary market. Thus, redefining the Indian financial services market and taking it closer to the world market.

Indian Capital Market

India has a transparent, technology enabled and well regulated capital market. Capital market achieves one of the most important functions of channelling idle resources to productive resources or from less productive resources to more productive resources. The capital market transactions involve lots of checks and balances with efficient electronic trading and settlement systems. The stock markets have a range of players including mutual funds, FIIs, hedge funds, corporate and other institutions. Domestic savings and capital inflows are channelised in the capital markets. The flow of resources in the securities market depends on the depth and efficiency of the markets, robust risk management system, attractiveness of securities and the ability of the users of capital to attract resources.

Securities and Exchange Board of India (SEBI) regulates the Indian capital markets. There are 24 exchanges (including active and non active exchanges) in the country, which offer screen based trading system. The trading system is connected using the VSAT technology. BSE is one of the oldest exchanges in Asia. National Stock Exchange (NSE) is forth largest exchange in the world in terms of number of trades. These exchanges constitute an organized market for securities issued by the Central and State Governments, public sector companies and public limited companies. The stock exchanges provide an efficient and transparent market for trading in equity, debt instruments and derivatives. The stock exchanges are demutualised, and have been converted into companies now, in which brokers only hold minority share holding. In addition to the SEBI Act, the Securities Contracts (Regulation) Act, 1956 regulates the stock markets.

Some of the fundamental changes that fuelled rapid pace of market growth were the introduction of electronic trading (secondary markets), allowing foreign ownership (FII's) of shares, permitting Indian companies to raise capital from abroad (ADRs/GDRs), expansion in the product range (equities, commodity, currency, derivatives and debt), book building process and transparency in IPO issuance, T+2 settlement cycle, dematerialization of shares and internet trading (e-broking). These changes resulted in dramatic growth of the stock markets in India as well as the equity broking firms. The broking industry is emerging as a rapidly growing segment in Indian finance, in terms of business growth, distribution & network and enterprise value.

Our markets went through a period of unusual liquidity squeeze. Broking companies, whose fortunes are closely linked to the markets, went through a tough time till early 2009. This was due to the fear of loss of business given the drop in trading volumes as well as participation by investors and traders. However, things have improved as liquidity was restored through aggressive steps (stimulus package) by the Central Bank and Government; and the markets as well as trading turnover have improved.

Key Strengths

Key strengths of the Indian capital markets include

- Fully automated trading system on all stock exchanges
- Wide range of products, an integrated platform for trading in both cash and derivatives
- Nationwide network for trading in a variety of securities
- Clearly laid out Regulations
- Proactive regulator
- Robust legal system

Capital market comprises of two segments- primary market (new issues, offer for sale) and secondary market (trading of stocks). There are two major types of issuers who issue securities. The corporate entities issue mainly debt and equity instruments (shares, debentures, etc.), while the governments (central and state governments) issue debt securities (dated securities, treasury bills).

Primary Market

Primary markets create a flow of new securities to the securities market. This is achieved through public offerings of debt or equity or a composite structure of debt and equity to the investors. Here the issuer of securities raises the funds to meet its fund requirements.

Primary market offerings could either be in the form of public offerings or private placements. The issuers here could include corporate, Government, municipal corporations and in some cases existing shareholders and institutional investors offering their securities for sale.

The product offerings by intermediaries in the primary markets include management of IPOs of issuers, mobilization of resources from retail and institutional investors, private placement of issues, debt syndications etc. Intermediaries in the primary market include merchant bankers, registrars and brokers.

During the year 2009-10, the resources raised through Public Issues, Rights Issues, QIP and Preferential Allotments are summarized in the table below:

Primary segment of the Indian capital market has witnessed a strong growth during the period 2002-03 to 2007-08, on the back of strong fundamentals, buoyant secondary markets, investor friendly framework, higher propensity to invest, availability of more secure investment options and sustainable growth oriented policies of government. This trend came to a halt in 2008-09 on the back of global financial crisis. The resources mobilized by Indian corporate declined sharply. The Indian primary market witnessed renewed activity in terms of resource mobilisation and number of issues during 2009-10, building it further from its relatively subdued pace in 2008-09. Post global financial crisis, companies entered the primary market received encouraging response from investor in 2009-10. This acceleration has gained momentum in 2010-11 with over ₹ 7000 crore mopped only in the first quarter.

Secondary Market

Secondary markets provide a medium of exchange and enable investors to trade in the securities. An efficient securities market distinguishes financial investments from various forms of other illiquid investments. Stock Exchanges provide the platform and the mechanism for effecting transactions between different market participants. Secondary market comprises of trading in equities, bonds and derivatives. The depth of the market is determined by number of factors such as liquidity of the instruments traded, number of market participants, types of instruments traded, settlement practices etc. A variant of the secondary market is the forward market, where securities are traded for future delivery and payment. Presently only two exchanges viz., NSE and BSE provide trading in the Futures & Options.

As on March 31, 2010 the number of companies listed at NSE is 1470. The trading volumes on NSE have been witnessing phenomenal growth over the past decade.

Equity Broking

As the Indian capital markets continue to evolve, they are undergoing rapid consolidation driven by increased trading volumes, increased regulation, customer sophistication, availability of better technology and increased back-office requirements. As a result, significant changes have been introduced to strengthen risk management systems. Changes in the regulatory framework and settlement mechanics have resulted in smaller operating players losing market share, leading to consolidation in the industry.

Market consolidation is even more pronounced in the on-line trading category where the top five brokers control a very significant share in the market. The rapid growth in on-line trading volumes can be attributed to the growing sophistication of retail investors, availability of reliable internet connectivity and the sophistication of the internet trading products. At the end of March 2010, a total number of 363 members were permitted to allow investor's web based access to NSE's trading system. The members of the exchange in turn had registered 5143705 clients for web based access as on March 31, 2010.

Financial Sector Regulation

There is no universal model for financial sector regulation. Some developed countries such as the US have continued with multiple regulators. Others have set up a single regulator e.g. the Financial Services Authority in the UK, which is also responsible for banking sector regulation.

Financial Sector Regulators	
Country	Regulators of Financial Services
UK	Financial Service Authority (FSA)
Japan	Financial Service Agency (FSA)
Germany	The Federal Financial Supervisory Authority (BaFin)
India	Banking - RBI Capital Markets - SEBI Insurance – IRDA Pension – EPFO and PFRDA

China	Banking – China Banking Regulatory Commission (CBRC) Capital Markets – State Council Securities Commission (SCSC) Insurance - The China Insurance Regulatory Commission (CIR)
USA	Banking - Federal Reserve Bank Capital Markets – Securities and Exchange Commission (SEC) Derivatives – Commodities and Futures Trading Commission (CFTC)

The real strength of the Indian securities market lies in the quality of regulation. The market regulator, Securities and Exchange Board of India (SEBI) is an independent and effective regulator. It has put in place sound regulations in respect of intermediaries, trading mechanism, settlement cycles, risk management, derivative trading and takeover of companies. There is a well designed disclosure based regulatory system. Information technology is extensively used in the securities market. The NSE and BSE have most advanced and scientific risk management systems.

Investment Pattern

According to the preliminary estimates by Reserve Bank of India (RBI) data, net financial savings of the household sector in 2008-09 was 10.43% of GDP at current market prices which was lower than the estimates for 2007-08 at 11.17%. Decline in the household investments in shares and debentures were the main factors responsible for the lower household saving in 2008-09. However, the household savings in instruments like currency, deposits, contractual savings (pension and provident funds) and investment in government securities remained broadly stable during the year. The household sector accounted for 89.5% of the Gross Domestic Savings in Fixed Income investment instruments during 2008-09, as against 78.2% in 2007-08. The investment of households in securities was -1.9% in 2008-09 as compared with 10.1% in 2007-08. One of the reasons can be adduced to negative sentiment prevailing in the global stock markets.

Non Banking Finance Companies

Non Banking Finance Companies (NBFCs) have played a crucial role in broadening the access to financial services, enhancing competition and in the diversification of the financial sector. NBFCs are increasingly being recognized complementary to the banking system, capable of spreading risks at times of financial distress. NBFCs are recognized as an integral part of the financial system with an impetus to improve the credibility of the entire sector. NBFCs are present in the competing fields of vehicle financing, hire purchase, lease, personal loans, working capital loans, consumer loans, housing loans, loans against shares, investments, distribution of financial products, etc.

Microfinance

Microfinance offers poor people access to basic financial services such as loans, savings, money transfer services and insurance. The industry emerged to alleviate poverty on the premise that poor people, like everyone else, need a diverse range of financial services to run their business, build assets and reduce vulnerability to fluctuations in their income. Their needs for financial services have been traditionally met through a variety of financial relationships, mostly informal. In the past two decades, different types of financial services providers for poor people have emerged, including non-government organizations, or NGOs, cooperatives, community-based development institutions like Self Help Groups, credit unions, commercial and state banks and microfinance institutions, or MFIs, offering new possibilities. The ultimate goal of microfinance is to enable the poor to build assets, increase incomes, reduce vulnerability to shocks and economic stress and improve quality of life by enabling better access to education and healthcare. The microfinance industry has grown at a rapid pace across the world and has created a positive impact in the lives of millions of poor people.

Importance of SME sector in India

The recent focus of most of the financial institutions in the country along with the GoI has been the SME sector to bring about inclusive growth in the economy of the country as the sector is one of the largest employers in the country. The SME Sector contributes 8% of India's GDP and plays a catalytic role in the Indian economy. It is estimated that the sector contributes around 45% of the manufacturing output and 40% of the total exports of the country. The sector employs about 59mn people in over 26mn units all over India. There are more than 6,000 products ranging from traditional handicrafts to hi-tech items. Urban area accounts for 55% of Micro, Small and Medium Enterprises (MSME) sector whereas rural accounts for 45%. Two-third of the SMEs is engaged in manufacturing activities whereas one-third is engaged in service-oriented business. Around 90% of the MSMEs in India are proprietary enterprises followed by 3.85% partnerships and 2.69% run by private companies.

ANNEXURE D - SIGNIFICANT ACCOUNTING POLICIES AND NOTES ON ADJUSTMENTS FOR RESTATED SUMMARY STATEMENT

Background:

1. Significant Accounting Policies

a. Basis of preparation of financial statements

The financial statements have been prepared to comply in all material respects with the Notified accounting standards by Companies (Accounting Standards) Rules, 2006 (as amended) and the relevant provisions of the Companies Act, 1956 ('the Act'). The financial statements have been prepared under the historical cost convention on an accrual basis. The accounting policies have been consistently applied by the Company and are consistent with those applied in the previous year.

b. Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the results of operations during the reporting period end. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates.

c. Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured and is recognized on accrual basis.

d. Fixed assets

All fixed assets are stated at historical cost less accumulated depreciation and impairment loss, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use.

e. Intangibles

Software cost related to computers are capitalized and amortized using the written down value method at a rate of 40% per annum.

f. Depreciation

i. Depreciation on fixed assets has been provided on the written down value method as per the useful lives of the assets estimated by the management or the rates prescribed under Schedule XIV of the Companies Act, 1956, whichever is higher.

ii. Fixed assets costing upto Rs. 5,000 individually are fully depreciated in the year of purchase.

g. Impairment

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater

of the asset's net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value at the weighted average cost of capital. After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

h. Leases

Leases where the lessor effectively retains substantially all the risks and benefits of ownership of the leased assets are classified as operating leases. Operating lease payments are recognized as an expense in the Profit and Loss Account on a straight-line basis over the lease term.

i. Income taxes

Tax expense comprises of current tax and deferred. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Indian Income Tax Act. Deferred income taxes reflects the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years.

Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. The carrying amount of the deferred tax assets are reviewed at each balance sheet date. The Company writes down the carrying amount of the deferred tax assets to the extent that it is no longer reasonably certain or virtually certain as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be that sufficient future taxable income will be available.

j. Earnings per Share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting preference dividend and attributable taxes) by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as fraction of an equity share to the extent that they were entitled to participate in dividends related to a fully paid equity share during the reporting period. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

k. Provisions

A provision is recognized when an enterprise has a present obligation as a result of past event; it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

l. Employee Benefits

Salary, bonus and other emoluments are charged to revenue in the year in which they are incurred.

The Company is not covered under the Employees State Insurance Act and the Provident Fund Act.

The company does not have any policy to pay leave encashment. Hence, no accrued liability on this account has been provided in the books of account.

In accordance with Accounting Standard 15, provision for Gratuity has been made on the basis of actuarial valuation based on projected unit credit method. The gratuity liability is wholly unfunded.

2. Notes to Restated Summary Statements

a. Accounting for miscellaneous expenditure:-

During the year ended 31st March 2008 the company had incurred miscellaneous expenditure of Rs.10,000/- in the nature of incorporation expenses. This expenditure was being amortized over a period of five years as per the company's policy, as against the requirement of Accounting Standard 26, "Intangible assets" notified accounting standard by Companies (Accounting Standards) Rules, 2006 (as amended), which requires miscellaneous expenditure in the nature of incorporation expenses to be charged off in the year in which these are incurred.

Similarly, during the year ended 31st March 2010 the company had incurred miscellaneous expenditure of Rs.922,044/- in the nature of expenses for increase in capital and share issue expenses. This expenditure is being amortized over a period of five years as per the company's policy, as against the requirement of Accounting Standard 26, "Intangible assets" notified accounting standard by Companies (Accounting Standards) Rules, 2006 (as amended), which requires miscellaneous expenditure in the nature of incorporation expenses to be charged off in the year in which these are incurred.

During the year ended 31st March 2011, the company has fully written off the miscellaneous expenses thereby complying with the requirement of Accounting Standard 26, "Intangible assets" notified accounting standard by Companies (Accounting Standards) Rules, 2006 (as amended).

b. The Company had not made any provision for payment of gratuity. This is not as per the requirements of Accounting Standard 15 "Employee Benefits" notified accounting standard by Companies (Accounting Standards) Rules, 2006 (as amended). However during the year ended 31st March 2011 the company has provided for gratuity liability at Rs.58,174/- relating to the financial year 2010-11. The company has also provided for gratuity liability of Rs.28,391/- relating to financial year 2009-10 in the accounts for the financial year 2010-11 under prior period expenses. The company had no gratuity liability for financial years prior to financial year 2009-10 as it had no employees in those years.

The gratuity liability has been worked out on Projected Unit Credit Method and on the basis of following assumptions:

The following discussion is based on and should be read in conjunction with our financial statements for each of the Fiscal 2008, 2009, 2010 and 2011, including the schedules, annexure and notes thereto and the reports thereon. This discussion contains forward-looking statements and reflects our current views with respect to future events and financial performance. Actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors. Factors that might cause future results to differ significantly from those projected in the forward-looking statements include, but are not limited to, those discussed below and elsewhere in this document, particularly in the chapters titled “*Risk Factors*” and “*Business Overview*” beginning on pages xiv and 54, respectively of this Red Herring Prospectus.

Significant Accounting Policies

a. Basis of preparation of financial statements

The financial statements have been prepared to comply in all material respects with the Notified accounting standards by Companies (Accounting Standards) Rules, 2006 (as amended) and the relevant provisions of the Companies Act, 1956 (‘the Act’). The financial statements have been prepared under the historical cost convention on an accrual basis. The accounting policies have been consistently applied by the Company and are consistent with those applied in the previous year.

b. Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the results of operations during the reporting period end. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates.

c. Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured and is recognized on accrual basis.

d. Fixed assets

All fixed assets are stated at historical cost less accumulated depreciation and impairment loss, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use.

e. Intangibles

Software cost related to computers are capitalized and amortized using the written down value method at a rate of 40% per annum.

f. Depreciation

i. Depreciation on fixed assets has been provided on the written down value method as per the useful lives of the assets estimated by the management or the rates prescribed under Schedule XIV of the Companies Act, 1956, whichever is higher.

ii. Fixed assets costing upto Rs. 5,000 individually are fully depreciated in the year of purchase.

g. Impairment

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the asset's net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value at the weighted average cost of capital. After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

h. Leases

Leases where the lessor effectively retains substantially all the risks and benefits of ownership of the leased assets are classified as operating leases. Operating lease payments are recognized as an expense in the Profit and Loss Account on a straight-line basis over the lease term.

i. Income Taxes

Tax expense comprises of current tax and deferred. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Indian Income Tax Act. Deferred

income taxes reflects the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years.

Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. The carrying amount of the deferred tax assets are reviewed at each balance sheet date. The Company writes down the carrying amount of the deferred tax assets to the extent that it is no longer reasonably certain or virtually certain as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be that sufficient future taxable income will be available.

j. Earnings per Share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting preference dividend and attributable taxes) by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as fraction of an equity share to the extent that they were entitled to participate in dividends related to a fully paid equity share during the reporting period. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

k. Provisions

A provision is recognized when an enterprise has a present obligation as a result of past event; it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

l. Employee Benefits

Salary, bonus and other emoluments are charged to revenue in the year in which they are incurred.

The Company is not covered under the Employees State Insurance Act and the Provident Fund Act.

The company does not have any policy to pay leave encashment. Hence, no accrued liability on this account has been provided in the books of account.

In accordance with Accounting Standard 15, provision for Gratuity has been made on the basis of actuarial valuation based on projected unit credit method. The gratuity liability is wholly unfunded.

Key factors affecting the results of operation

Our company's future results of operations could be affected potentially by the following factors:

General economic and business conditions: The demand for our services is dependent on general economic conditions in the country. Our operations would be affected by any adverse change in the government policies, rules and regulations.

Competition: We face significant competition from other investment banks in the markets in which we operate. In recent years, international banks have also entered our markets. Some of these firms have greater resources and/or a more widely recognised brand than us, which may give them a competitive advantage. Our ability to grow our revenues will depend on demand for our services in preference to those of our competitors.

Security Market Conditions: As on date, a significant portion of our revenue is derived from investment banking activities which are directly correlated to capital market conditions. Our business is impacted adversely by market fluctuations and adverse conditions therein. In recent years, the Indian and world securities markets have fluctuated considerably and there is no assurance that this trend will not continue and impact our business.

Client Relationships: In our Investment banking business, revenues are largely influenced by the number, as well as quality of our institutional and corporate clients, and also our ability to grow our share of clients' business by providing advisory services, innovative business solutions, and efficient execution. We believe successfully developing new customer relationships, or retaining existing customer relationships is critical for growing our businesses and consequently our results of operations and earnings.

Regulatory developments and authorities: We operate in sectors that are heavily regulated in India, and we are regulated by, and our activities are subject to supervision and regulation by multiple statutory and regulatory authorities. In recent years, existing rules and regulations have been modified, new rules and regulations have been enacted and reforms have been implemented which are intended to provide tighter control and more transparency in India's securities sectors. Changes in government and other regulatory policies affecting the financial services industry could require changes to our systems and business operations and could involve additional costs and management time. Other general changes in economic and regulatory policy may also affect our business, as they affect the businesses, financial health and investment policies of our customers. India has been charting a course of economic liberalization and deregulation in recent years. Some policy changes may be beneficial to our business, while others may have a negative impact.

People: We are dependent on our senior management, directors and other key personnel. There is high demand in the Indian financial services industry for senior management and qualified employees and we must continue to reward employees in line with the market to remain competitive and to retain and attract well-qualified individuals.

Operating Cost: Personnel cost is one of the major components of our total cost. As we add further businesses and grow our existing ones, we will need an increase of manpower. The Indian financial services sector is highly competitive, and it can be difficult and expensive to attract and retain talented and experienced employees. Administrative and other costs also make up a large percentage of our total cost. This includes various costs like our establishment expenses, travel & communication related expenses and fee to various third parties that help us during the course of an assignment. We expect the expenditure on these services to go up with the increase in volumes in our business.

New businesses: A significant portion of the issue proceeds from this issue would be utilised for setting up of our PMS business. In the past we have set up our Investment Banking Business and have been able to grow it in the financial services sector. Our results in the medium term will depend on the performance of our existing as well as new businesses and our ability to identify and exploit new lines of business for future growth. As some of our businesses mature and their growth rates moderate, if we are not successful in scaling up our Investment banking and PMS Business or in germinating profitable new business lines, our earnings may be adversely affected.

For further details, please refer to section titled “Risk Factors”, “Objects of the Issue”, “Business Overview” and “Industry Overview” of this Red Herring Prospectus on page numbers xiv, 29, 54 and 43 respectively of this Red Herring Prospectus.

Sundry Debtors/Recovery of Receivables: Any delay in the recovery of outstanding receivables, may affect our results of operation, as we may then have to resort to increased borrowings for our working capital requirement, which may further pressure on outgo towards interest thereby reducing our profits.

Discussion on results of operation: The following discussion on results of operations should be read in conjunction with the audited financial results of our Company for the years ended March 31, 2008, 2009, 2010 and 2011.

Results of Operations

As a result of the various factors discussed above that affect our income and expenditure, our results of operations may vary from period to period. The following table sets forth certain information with respect to the results of operations of the Company as derived from our restated financial statements for the periods indicated:

Revenues: Our revenues consist of income from operations and other income.

- Income from Operations:** Our income from operations consists principally of income from investment banking and related services, which includes fee-based income from merchant banking, corporate advisory (including research services), and professional fees. The fee in investment banking business is structured lop sided towards the end. This means that we receive a greater chunk of fee when a mandate is executed. The money received at inception of a mandate is usually small compared to the fee that's due post completion of the assignment.
- Other Income:** Other income consists primarily of interest earned on bank deposits.

Expenditure: Our expenditure primarily consists of operating expenses, staff costs, administrative and other expenses, interest and depreciation/amortization.

- a. **Staff Costs:** Our staff costs include salaries, bonuses, ex-gratia payments, directors' remuneration and training costs. These costs vary proportionate to the change in business volumes. A part of these cost is fixed and hence inflexible and standard.
- b. **Administrative and Other Expenses:** The principal components of administrative expenses relate to costs associated with bank charges, telephones, electricity, repairs, rent, rates and taxes, printing and stationery, travelling, legal and professional fees and audit fees.

Moreover our business is dependent on several clients for whom we are executing transaction at a given point of time. These customers keep on changing with completion of assignment. Till date we have not experienced any repeat customers due to limited operational history. Therefore the continuance of our business operations is highly dependent upon constant marketing of our services and origination of new mandates to work on .

Comparison of financial results for Fiscal 2010 - 2011

Fiscal 2011 was an important benchmark in the history of our company as we submitted 3 IPO documents with SEBI and signed several more mandates to raise money through IPO and Debt. Our income from operations decreased during this fiscal by approximately 40% YOY on account of non execution of any fund -raising mandate during this period owing to early stage of business operations. This income stood at ₹ 3.7 million primarily on account of fee based income from advisory services and milestone based payments in the fundraising mandates. The other income during this period stood at ₹ 214,367 on account of interest income which saw an increase of about 500% over fiscal 2011. Further, our operational expenditure increased by 94% YOY to reach ₹ 9.71 Million in Fiscal 2011. This expenditure included operating expenses, staff costs, Professional fee, administrative and other expenses. The major reason behind this increase was the fact that our company was growing and team was expanding and in the most mandates that we were working on a significant amount of time and resources were deployed which will manifest in returns only after completion of mandates. A greater chunk of this expense (50%) went in staff costs which is a major part of cost in our industry which went up by 134% YOY due to expansion in team. Our administrative and other expenditure went up by 181% during the period in question due to increased business activity. Our depreciation expenses also went up by 155% on the back of 61% increase in gross block and full year of utilisation for most assets.

Comparison of financial results for the Fiscal 2009 - 2010

Fiscal 2010 was the first year of operation for our company where during the first half of the fiscal major focus was on putting an operational team in place and securing the Merchant banking license. During the later half of the year our energies were focused on prospecting for business. We secured 3 mandates in this year post getting our merchant banking license. Income from operation for this fiscal increased from nil to ₹ 6.13 Million primarily on account of fee based income from advisory services and other income increased from nil to ₹ 35,820 on account of interest income. Further, we incurred an expenditure of ₹ 3.85 million, which includes operating expenses, staff costs, administrative and other expenses. This expenditure was uncomparable from the last accounting period due to absence of any business in the company in Fiscal 2009. This increase in expenditure was a result of transformation into an operational company. Staff cost this year contributed 55% to the operational costs with induction of our team. We also did a one time write off of preliminary expenses amounting to ₹ 1.15 million. These expenses were expenses relating to RoC fee. Depreciation for this year increased by 72% on the back of increase in assets which were bought for the team that joined our business.

Comparison of financial results for the Fiscal 2008 – 2009

The income for this year was nil as there were no operations and thus no revenues. We did not have any income from operations or other income during Fiscal 2009. Further, we incurred ₹ 5,515 as expenditure only in connection with the day-to-day operations including towards administrative costs which was uncomparable to last year as fiscal 2008 was the year when compny was started. The depreciation for this year increased by 87%, with full year utilisation of the assets.

Discussion of financial results for the Fiscal 2008

We did not have any income from operations or other income during Fiscal 2008. Further, we incurred expenditure only in connection with the day-to-day operations including towards administrative costs, regulatory filings and depreciation.

Any revision in the Price Band and the revised Bid/ Issue Period, if applicable, will be published in three (3) national newspapers (one (1) each in English and Hindi and Marathi) with wide circulation and also by indicating the change on the websites of the BRLM and at the terminals of the members of the Syndicate.

Copies of ASBA Bid Cum Application Forms will be available for downloading and printing, from website of the Stock Exchanges (which provide electronic interface for ASBA facility).

4. Each Bid Cum Application Form will give the Bidder the choice to bid for up to three optional prices (for details refer to section titled “ Issue Procedure - *Bids at Different Price Levels*” on page 155 of the Red Herring Prospectus) within the Price Band and specify the demand (i.e., the number of Equity Shares Bid for) in each option. The price and demand options submitted by the Bidder in the Bid Cum Application Form will be treated as optional demands from the Bidder and will not be cumulated. After determination of the Issue Price, the maximum number of Equity Shares Bid for by a Bidder at or above the Issue Price will be considered for allocation/Allotment and the rest of the Bid(s), irrespective of the Bid Amount, will become automatically invalid.
5. The Bidder cannot bid on another Bid Cum Application Form after Bids on one Bid Cum Application Form have been submitted to any Syndicate Member or the SCSBs. Submission of a second Bid Cum Application Form to either the same or to another Syndicate Member or the SCSB will be treated as multiple Bids and is liable to be rejected either before entering the Bid into the electronic bidding system, or at any point of time prior to the allocation or Allotment of Equity Shares in this Issue. 6. The Syndicate Members/the SCSBs will enter each Bid option into the electronic bidding system as a separate Bid and generate a Transaction Registration Slip, (“**TRS**”), for each price and demand option and give the same to the Bidder. Therefore, a Bidder can receive up to three TRSs for each Bid Cum Application Form.
7. Along with the Bid Cum Application Form, all Bidders (other than ASBA Bidders) will make payment in the manner as described in section titled “Issue Procedure - *Payment Instruction*” on page 167 of the Red Herring Prospectus.
8. Upon receipt of the ASBA Bid Cum Application Form, submitted whether in physical or electronic mode, the Designated Branch of the SCSB shall verify if sufficient funds equal to the Bid Amount are available in the ASBA Account, as mentioned in the ASBA Bid Cum Application Form, prior to uploading such Bids with the Stock Exchanges.
9. If sufficient funds are not available in the ASBA Account, the Designated Branch of the SCSB shall reject such Bids and shall not upload such Bids with the Stock Exchanges.
10. If sufficient funds are available in the ASBA Account, the SCSB shall block an amount equivalent to the Bid Amount mentioned in the ASBA Bid Cum Application Form and will enter each Bid option into the electronic bidding system as a separate Bid and generate a TRS for each price and demand option. The TRS shall be furnished to the ASBA Bidder on request.
11. The Bid Amount shall remain blocked in the aforesaid ASBA Account until finalisation of the Basis of Allotment and consequent transfer of the Bid Amount against the Allotted Equity Shares to the Public Issue Account, or until withdrawal/failure of the Issue or until withdrawal/rejection of the ASBA Bid Cum Application Form, as the case may be. Once the Basis of Allotment is finalized, the Registrar to the Issue shall send an appropriate request to the Controlling Branch of the SCSB for unblocking the relevant ASBA Accounts and for transferring the amount allocable to the successful Bidders to the Public Issue Account. In case of withdrawal/failure of the Issue, the blocked amount shall be unblocked on receipt of such information from the Registrar to the Issue.

Bids may be made in single or joint names (not more than three). In the case of joint Bids, all payments will be made out in favour of the Bidder whose name appears first in the Bid Cum Application Form or Revision Form. All communications will be addressed to the First Bidder and will be dispatched to his or her address as per the Demographic Details received from the Depository.

Multiple Bids

A Bidder should submit only one Bid (and not more than one) for the total number of Equity Shares required. Two or more Bids will be deemed to be multiple Bids if the sole or First Bidder is one and the same.

In this regard, the procedures which would be followed by the Registrar to the Issue to detect multiple applications are given below:

1. All applications with the same name and age will be accumulated and taken to a separate process file which would serve as a multiple master.
2. In this master, a check will be carried out for the same PAN. In cases where the PAN is different, the same will be deleted from this master.
3. The Registrar to the Issue will obtain, from the depositories, details of the applicant's address based on the DP ID and beneficiary account number provided in the Bid Cum Application Form and create an address master.
4. The addresses of all the applications in the multiple masters will be strung from the address master. This involves putting the addresses in a single line after deleting non-alpha and non-numeric characters i.e. commas, full stops, hash etc. Sometimes, the name, the first line of address and pin code will be converted into a string for each application received and a photo match will be carried out amongst all the applications processed. A print-out of the addresses will be taken to check for common names. The applications with same name and same address will be treated as multiple applications
5. The applications will be scrutinised for DP ID and Beneficiary Account Numbers. In case applications bear the same DP ID and Beneficiary Account Numbers, these will be treated as multiple applications.
6. Subsequent to the aforesaid procedures, a print out of the multiple masters will be taken and the applications physically verified to tally signatures as also father's/ husband's names. On completion of this, the applications will be identified as multiple applications.

In case of a mutual fund, a separate Bid can be made in respect of each scheme of the mutual fund registered with SEBI and such Bids in respect of more than one scheme of the mutual fund will not be treated as multiple Bids provided that the Bids clearly indicate the scheme concerned for which the Bid has been made.

Our Company reserves the right to reject, in our absolute discretion, all or any multiple Bids in any or all categories.

Mode of making refunds for Bidders other than ASBA Bidders

The payment of refund, if any, for Bidders other than ASBA Bidders would be done through various modes in the following order of preference:

This mode of payment of refunds would be subject to availability of complete bank account details including the MICR code as appearing on a cheque leaf, from the Depositories. The payment of refunds is mandatory for applicants having a bank account at any of the centres where such facility has been made available, except where the applicant, being eligible, opts to receive refund through direct credit or RTGS.
2. Direct Credit – Applicants having bank accounts with the Refund Banker(s), as mentioned in the Bid Cum Application Form, shall be eligible to receive refunds through direct credit. Charges, if any, levied by the Refund Banker(s) for the same would be borne by our Company.

Such eligible applicants who indicate their preference to receive refund through RTGS are required to provide the Indian Financial System Code (IFSC) in the Bid Cum Application Form. In the event the same is not provided, refund shall be made through ECS. Charges, if any, levied by the Refund Banker(s) for the same would be borne by our Company. Charges, if any, levied by the applicant's bank receiving the credit would be borne by the applicant.
4. NEFT (National Electronic Fund Transfer) – Payment of refund shall be undertaken through NEFT wherever the applicants' bank has been assigned the IFSC, which can be linked to a MICR, if any, available to that particular bank branch. IFSC Code will be obtained from the website of RBI as on a date immediately prior to the date of payment of refund, duly mapped with MICR numbers. Wherever the applicants have registered their nine digit MICR number and their bank account number while opening and operating the demat account, the same will be duly mapped with the IFSC Code of that particular bank branch and the payment of refund will be made to the applicants through this method. The process flow in respect of refunds by way of NEFT is at an evolving stage, hence use of NEFT is subject to operational feasibility, cost and process efficiency. In the event that NEFT is not operationally feasible, the payment of refunds would be made through any one of the other modes as discussed in the sections.
5. For all other applicants, including those who have not updated their bank particulars with the MICR code, the refund orders will be despatched under certificate of posting for value upto ₹ 1,500 and through Speed Post/ Registered Post for refund orders of ₹ 1,500 and above. Rationale

IPO Grading of Onelife Capital Advisors Limited

Grading

Particulars	No. of equity shares of (face value of Rs.10/- each)	Grading
IPO Grading	33,50,000	'CARE IPO Grade 1'

CARE has assigned a 'CARE IPO Grade 1' to the proposed Initial Public Offer (IPO) of Onelife Capital Advisors Limited (OCAL). 'CARE IPO Grade 1' indicates 'Poor Fundamentals'. CARE assigns IPO grades on a scale of Grade 5 to Grade 1, with Grade 5 indicating strong fundamentals and Grade 1 indicating poor fundamentals. CARE's IPO grading is an opinion on the fundamentals of the issuer. The grade assigned to any individual issue represents a relative assessment of the 'fundamentals' of the issuer.

Grading Rationale

The grading factors in OCAL's small size of operations which are currently loss making, limited track record, moderate management profile, lack of diversified revenue streams, lack of branch network, highly competitive merchant banking business, high dependence on capital markets which exposes OCAL's business to volatility in stock market which may impact its revenues and profitability.

Company Profile

Onelife Capital Advisors Limited (OCAL) was incorporated as "Onelife Corporate Advisory Services Private Limited", as a private limited company on August 31, 2007 by Mr. TKP Naig and Mr. Pandoo Naig. The name of the company was changed to "Onelife Capital Advisors Private Limited" on November 07, 2009. Subsequently, in December 2010, the company was converted into a Public Limited Company and the name of the company was changed to "Onelife Capital Advisors Limited". Promoters and Management

Promoters of the company are Mr. Thiruvaidamarudur Krishna Prabhakara Naig (holding a stake of 68.98%) and Mr. Pandoo Prabhakar Naig (30.52%). The relatives of the promoters hold the remaining stake. Mr. Thiruvaidamarudur Krishna Prabhakara Naig has more than 25 years of experience in the field of Capital Market and Investment Banking activities. He held the position of President and Managing Director of Indbank Merchant Banking Services Ltd. (a subsidiary of Indian Bank). The promoters handle the day to day operations of the company. The second level of management is still evolving.

Corporate Governance

The board of directors is responsible for corporate governance practices in the company. OCAL has six directors on its board out of which three (constituting more than one third of the board) are independent directors. OCAL has constituted an Audit Committee and a Shareholders / Investors' Grievance committee which have directors of the company as members.

Litigations

There were no outstanding litigations or disputes against / filed by OCAL which would have any financial implications on the company. There are certain legal proceedings involving the promoter and the group company at different levels of adjudication. The details are given below:

- The promoter, Mr. Pandoo Naig, has filed a case against a third party. The case is pending.
- The promoter, Mr. Pandoo Naig, has been served a notice by the Income Tax Department on December 28, 2010 demanding an amount of Rs.17.6 crore. He has filed an appeal to the Commissioner against the said demand and the case is under litigation.
- One of the promoters' group entity 'Sai Broking' has been issued two show cause notices by SEBI for alleged violation of the provision of SEBI (Prohibition of Fraudulent and Unfair Trade Practices relating to Securities Market) Regulation, 2003 and SEBI Stock Broker and Sub Broker) Regulations, 1992 as observed during the investigations conducted by SEBI into the trading of certain scrips.

Employee cost, rent and office expenses were the major expenses in FY10. The company generated a PAT of Rs.13.5 lakh at a margin of 22%. During H1FY11, the company incurred a loss of Rs.18.3 lakh due to lower income generation and increase in staff cost and general administrative expenses. Net worth jumped to Rs.5.0 crore in FY10 due to infusion of equity by the promoters. Further in the six month period ended September 30, 2010, Mr. Pandoo (promoter) was allotted 5.5 lakh shares at a premium of Rs.90 which led to further increase in the net worth. OCAL has given a security deposit of Rs.4.0 crore to a group entity, Mint Street Estate

Private Limited, for the premises that it is using as its office. OCAL had provided advisory services to a company in FY10 and is yet to receive payment for these services. Out of the total debtors of Rs.56.7 lakh, 80% are outstanding for more than six months. However, the company expects to receive the payment of Rs.44.8 lakh in FY12.

Industry Outlook

A transparent, efficient and well developed stock market facilitates investment and economic growth and is an important factor in development of financial markets like India. India's stock market has evolved over the years and has seen structural reforms in system as well as regulation and supervision in recent times, particularly after the establishment of Securities Exchange Board of India (SEBI) as the market regulator.

Stringent regulations put forth by SEBI periodically and improving technology led to well regulated highly systems enabled capital market in India. System based trading and settlement has helped market-determined prices and allocation of resources, screen-based nation-wide trading, T+2 settlement, scrip less settlement and electronic transfer of securities, rolling settlement and derivatives trading leading to improved regulatory framework and efficiency of trading and settlement. Presently, there are 22 recognized stock exchanges in India and the stock markets now have various players including mutual funds, FIIs, hedge funds, corporate and other institutions and retail public. OCAL's performance is dependent on performance of the domestic and global financial markets. An upward trend in the market would result in higher demand for the investment banking and advisory services offered by the company.
